

# Installation Instructions

## Dehydrator Connection to Transmission Line

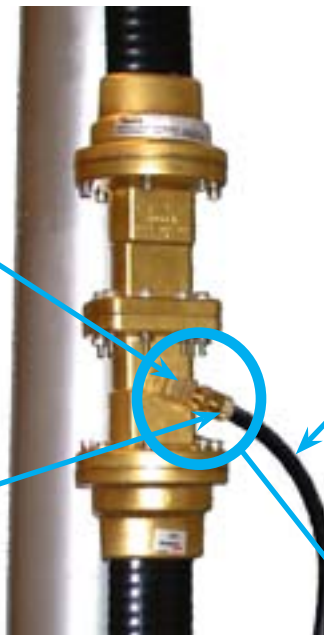

Installation accessory kit that allows the unit to mount parallel to a transmission line flange.

Apply PTFE tape to the male threads (if not pre-applied) and assemble in a stack: Street Elbow and Male Connector as shown below. Use a 9/16" or adjustable wrench to tighten the stack.

Install Street Elbow into pressure inlet port of a transmission line flange or pressure window/gas inlet as shown. Use a 9/16" or adjustable wrench to tighten the connection.

Cut the provided tubing as needed to fit your system requirements..

Use a 9/16" or adjustable wrench to tighten the male connector into the 90° Street Elbow. Connect to the 3/8" Poly Tube.
