

Theft Deterrent Grounding Bars

Help protect your grounding system from theft with Andrew grounding bars and tamper resistant hardware. All versions of Andrew solid copper and tin plated copper grounding bars are now stamped with warnings to help deter theft.

- Registered property
- Recycling prohibited

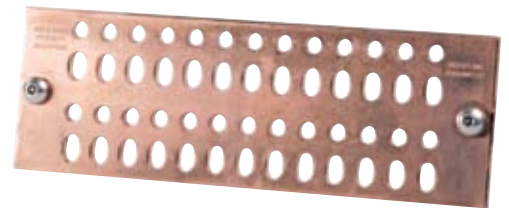

Additional layers of protection can also be added to these stamped grounding bars. Tin plating will hide bare copper and also improve ground conductivity by eliminating copper oxide tarnishing. Tamper resistant hardware which cannot be removed by common hand tools adds a measure of security as well.

Andrew grounding bars are made of solid 1/4" copper in a wide range of sizes and hole patterns to accommodate just about any application. Each kit comes complete with insulators, hardware, and stainless steel brackets for shelter mounting and angle adapters for tower mounting.

Ordering Information

Part Number	Description
UGBKIT	Universal Ground Bar Kit 2 1/2" X 19 1/2"
UGBKIT-T	Universal Ground Bar Kit 2 1/2" X 19 1/2", Tin
