NG4-CABLED-MODULES

NG4access® Cabled Modules available in all module sizes and fiber counts up to 864 fibers

NG4 cabled modules with LC and SC connectivity enable the routing of fiber cable to the frame, where multiple connectors are terminated to the frame with a single click. Cabled modules with integrated connectors ensure the cables are kept in sequential order, and help prevent accidental fiber breakage or disruption to adjacent fibers during installation.

Cabled modules are available in a pigtail version for splicing on frame or pre-terminated to 24-fiber microcable, conventional IFC cable or Indoor/outdoor cable.

Cable type options:

- IFC stranded
- IFC ribbon
- Indoor/outdoor stranded
- Indoor/outdoor ribbon
- Indoor/outdoor rollable ribbon
- Microcable

Connector type options:

- LC/UPC (front/rear)
- SC/UPC (front/rear)
- LC/APC (front/rear)
- SC/APC (front/rear)
- MPO (rear)
- stub (rear)

Product Classification

Regional Availability	Latin America	North America
Portfolio	CommScope®
Product Type	Fiber cabled module
Product Brand	NG4access®
Product Series	NG4
Ordering Note	For fiber modules with custom cable lengths, please contact your local CommScope representative

General Specifications

Body Style	Straight orientation
