

# VTRANSXKC-3-6

---

Dual-polarized output transition for USX antennas, 3.6 - 4.2 GHz, CPR229G flanges

## Product Classification

**Product Type** Output transition kit

## General Specifications

**Polarization** Dual

## Electrical Specifications

**Operating Frequency Band** 3.600 – 4.200 GHz

## Packaging and Weights

**Included** Flange hardware kit | OMT hardware kit | OMT transition

## Regulatory Compliance/Certifications

Agency	Classification
CHINA-ROHS	Below maximum concentration value
REACH-SVHC	Compliant as per SVHC revision on <a href="http://www.commscope.com/ProductCompliance">www.commscope.com/ProductCompliance</a>
ROHS	Compliant

## \* Footnotes

**Operating Frequency Band** Bands correspond with CCIR recommendations or common allocations used throughout the world. Other ranges can be accommodated on special order.
