

Temporary Wireless Solutions

Interim Cell Site Solutions

COMMScope®

Professional Services Data Sheet

CommScope's Professional Services team provides the field experience and technical expertise to help you get your interim cell site solution up and running quickly. End-to-end services include:

- White glove delivery: packing, shipping, unpacking, placement and clean-up
- Installation: ground base/blocks, tower/mast and antenna mounting and rigging, cabinet installation, cabling and grounding
- Service activation: backhaul setup and connection, 4G/5G equipment configuration, provisioning, activation, testing and drive-test coverage verification
- Site documentation and support: remote or onsite monitoring and maintenance throughout deployment

Our Professional Services team is ready and locally responsive to ensure your interim cell site solution is properly deployed and performing as soon as possible. With expert managed services, we can also provide 24/7 monitoring and maintenance and tech support for you or your end users.

Demand for 5G and other wireless services is surging but can be highly unpredictable at times. Unexpected lease terminations (NTQs), special events and local emergencies can leave mobile network operators (MNOs) scrambling to deploy wireless capacity and coverage.

MNOs need a reliable source for temporary cell site solutions; flexible solutions that deploy quickly and perform consistently—regardless of application, location or requirements; and one partner who can help them overcome the three biggest challenges in permanent site deployment: site acquisition, power and backhaul. That's why MNOs rely on CommScope and our range of interim cell site solutions.

Interim cell site solutions from CommScope

CommScope's portfolio of interim cell site solutions delivers the performance and flexibility to meet local siting and permitting regulations while ensuring the 4G/5G wireless coverage and capacity you need. So, they are perfect for:

- Emergency site replacement
- Temporary relocation of a permanent site
- Large construction projects or special events in areas with no coverage
- Lease terminations
- Emergency and disaster recovery
- In-fill for areas with unplanned traffic spikes

CommScope turnkey solutions enable you to quickly deploy and maintain high-capacity 4G/5G service, when and where it's needed. Compact, weather-proof and full-featured, each interim solution uses a non-ground intrusive (NGI) design with pre-made concrete blocks to reduce installation time.

With the help of CommScope's Professional Services team, you can be up and running within 24 hours. Engineered, tested and supported by a global leader in mobile network solutions, CommScope solutions provide performance you can count on.

Flexible—deploy the coverage and capacity you need, when and where you need them

Each CommScope interim cell site solution includes the elements* needed to deliver and maintain carrier-grade 4G/5G service for as long as you need:

- Monopole or compound tower/mast structure
- Non-ground invasive platform, base or blocks
- Outdoor cabinet with built-in air conditioning
- Antennas that meet your performance requirements
- Microwave dishes or fiber connectivity
- Power generator and backup battery bank
- All power, grounding, data and RF cabling
- Miscellaneous installation materials

With CommScope, your flexibility is built in. Mix and match components to get the capabilities you need. Choose from different mast or tower types with heights up to 30 meters. Deploy up to nine antennas and six microwave dishes depending on your coverage and capacity requirements.

Rely on CommScope—whenever, wherever

You can't always predict when and where you'll need reliable temporary wireless service. With CommScope's interim cell site solutions, you know you've got a dependable partner who can deliver—whenever, wherever. But don't wait until you need us. Contact your CommScope account manager or visit our [Wireless Professional Services webpage](#) today to see how we can help. CommScope keeps you prepared for what's next.

*Turnkey delivery does not include the 4G/5G radios
