

Enhanced Uniprise® Shielded S/FTP Patch Cords: New Product

North America Region

CommScope is proud to announce a new line of Uniprise® Shielded Patch Cords offering the industry a smaller diameter, more flexible patch cord. The new Uniprise cords utilize a 26 AWG stranded S/FTP patch cord cable that is only 5.7mm [0.224in] in diameter. The use of 26AWG stranded conductors combined with the small diameter provides for one of the most flexible and smallest shielded patch cords on the market. The S/FTP construction provides for excellent cross-talk performance even at the highest of frequencies.

The patch cord utilizes a slim-line transparent boot that accepts the use of CommScope modular plug color clips (MP-ColorClip) for additional easy circuit/cable identification. Also the new patch cords will support the soon to be released CommScope Pull-Latch for use in high-density applications.

The Uniprise S/FTP patch cords have been tested and provide both patch cord component and channel level performance in Uniprise F/UTP Shielded systems.

- Small diameter cable: 5.7mm [0.224in]
- Highly flexible cable: 26AWG stranded conductors
- Superior Performance: S/FTP Construction
- Supports Uniprise F/UTP cabling systems
- Slim-line, transparent boot supporting both CommScope Color Clips and Pull-Latch
- Available in Cat 6 and Cat 6A performance
- Available February 1, 2018

Ordering Information:

Region: North America

Please visit eCatalog at the link provided. <http://www.commscope.com/SiteSearch/?q=UC111G2>

Uniprise will be superseding its present portfolio of Shielded F/UTP patch cords with this new line of S/FTP patch cords. Additionally, because Uniprise is only being offered in North America the present line of LSZH patch cords will be discontinued (UC1FFJ2 and UC1GGJ2). The last time buy date for the F/UTP cords will be May 1, 2018
