

What can Andrew Cabinets do for you?

A Cabinet is the Bomb Shelter for your Equipment

- Andrew has developed a line of cabinets that are **customized for the wireless industry** yet can provide them with the savings associated with off-the-shelf product.
- Andrew's innovative hybrid cooling solution (Direct Air + TEC Air Conditioning) yields **significant utility power savings** over conventional air conditioning methods.
- Configurable cooling options **optimize thermal performance/cost**
- "Positive pressure" cooling system **maximizes moisture protection**
- Variable speed fan technology for **minimal acoustic signature and power consumption**
- Universal "common platform" provides **cost/lead time advantages**
- Flexible design that accepts a broad range of OEM equipment
- Full **compliance to environmental and reliability requirements**
- Field proven, environmentally rugged powder coat paint capability
- Demonstrated ability to produce in large volumes
- Full equipment access for **ease of installation and maintenance**
- Provides additional battery strings for **reliable back-up power**
- Provides **solution to "Katrina Order"** requiring all sites have 8 hours of power back-up
- Designed to accommodate large number of battery suppliers
- SAFT, EnerSys, FIAMM, C&D and GS
- Provides **corrosion, weather, fire and vandal resistant protection**
- **Extends life of batteries** with enhanced cooling technique
