

Coaxial Solutions

North America

Coaxial cable's bandwidth versatility makes it ideal for a full range of applications including satellite, residential, video distribution, broadcast, industrial and security.

CommScope®: Optimal Performance for Coaxial Applications

Today's era is riding a technology wave, and reliable video has become an expected standard. Whether that video supports a home theater for your family, video conferencing for a healthcare facility, or security cameras for an industrial plant, coaxial cable is the vehicle that will take you there.

Coaxial cable's bandwidth versatility makes it ideal for a full range of applications including satellite, residential, video distribution, broadcast, industrial and security. Because of its high resistance to Electromagnetic Interference (EMI) and its sturdy construction, coax lends itself to easy installation and damage-resistant performance. As a result, it has long been a favorite of network designers.

CommScope® is a world leader in cable and connectivity solutions for communications networks. We make more high-performance, high-bandwidth cable than anyone else in the world. In fact, our resources make us capable of producing over one million feet of coax per day. With a 20 year warranty our coaxial cables are second to none, providing optimal visuals for applications across a host of markets, from healthcare to industrial, retail to residential.

CommScope provides far more than coax: we deliver a complete, end-to-end physical layer solution, including cables and connectivity for twisted pair, coax and optical fiber applications, network cabinet enclosures, intelligent infrastructure software, and network design services. Through our industry-defining solutions, we meet and exceed communications expectations for your workplace and your home. We offer our industry's highest performing connectivity solutions for data, voice, video and building management applications in both wired and wireless networks. Backed by strong research and development, CommScope enables enterprise customers around the world to support current applications and take advantage of future business and technology opportunities by providing the right network solution for every need.

Security/CCTV

No matter what your facility serves, security is of the utmost importance. Your investment relies upon the performance of your security and CCTV equipment, and coax provides the backbone for those systems. Security cabling in particular is demanding and unforgiving, which makes choosing a dependable cable as important as placing the camera. Why risk your safety by installing an unreliable or poor quality cable?

CommScope offers a full line of coax cables essential to the security market, and produces cables for quality CCTV reception in plenum and non-plenum. When it comes to security and CCTV, ensure performance and the security of your facility with CommScope coax products.

Broadband Video/Video Distribution

In today's technology wave, high-quality, reliable video has become standard. Industrial and healthcare environments often look to video to support ongoing work, while retail and residential environments rely on video to help create a delightful, welcoming atmosphere.

Video transmission is itself demanding, and fast transmission rates without the capability of real-time connection allow no room for error. The cables themselves must feature a bandwidth that can support today's demands for HDTV and high-speed Internet, as well as maintaining consistent transmission for video and video conferencing.

CommScope's video coax cables provide crisp, clean reception with the dependability to support top quality transmission and the flexibility that makes for easy installation. With such high demands for video today, and with so much at stake in some video environments, why take chances? CommScope is the cable of choice for broadband video and video distribution.

Satellite

A typical satellite transmission travels thousands of miles with exceptional clarity. That clarity, though, relies as well on the last 100 feet from the dish to a television or receiver. Why sacrifice satellite quality to substandard cable?

For the highest quality in DSS (Digital Satellite Systems), VSAT (Very Small Aperture Terminal) and TVRO (Television Receive Only), rely on CommScope's satellite cable products. Our high-frequency satellite transmission cables are engineered to deliver crisp, clear signal for both digital and analog satellite systems. When it comes to satellite picture quality, why settle for anything less than CommScope coax?

So when you are relying on coax cable, rely on the world leader. For trusted security and CCTV applications; for crisp, high quality video; and for clear satellite transmission, CommScope coax cables are the ideal choice.

Ordering Information

Product Number	Description
Plenum Video	
2020V	Series-59 Dual Shield, CCS
2229V	Series-6 Quad Shield, BC
2273V	Series-6 Dual Shield (90%), BC
2275V	Series-6 Dual Shield, CCS
2227V	Series-6 Quad Shield, CCS
2227K	Series-6 Quad Shield, Kynar, CCS
2279V	Series-6 HDTV
2284K	Series-11 Dual Shield, Kynar, BC
2285K	Series-11 Dual Shield, Kynar, CCS
2287K	Series-11 Quad Shield, Kynar, CCS
P59DSCCS	Series-59 Dual Shield, CCS
P6DSCCS	Series-6 Dual Shield, CCS
P6QSCCS	Series-6 Quad Shield, CCS
Non-Plenum Video	
5727	Series-6 Dual Shield (90%), CCS
5730	Series-6 Dual Shield, CCS
5740	Series-6 Quad Shield, CCS
5729	Series-6 Dual Shield, BC
5781	Series-6 Quad Shield, BC
5738	Series-6 Dual Shield, Burial
5916	Series-11 Dual Shield, CCS
5917	Series-11 Dual Shield, Burial
5940	Series-11 Quad Shield, CCS
NP6DSCCS	Series-6 Dual Shield, CCS
NP6QSCCS	Series-6 Quad Shield, CCS
NP6DSBC	Series-6 Dual Shield, BC
NP6QSBC	Series-6 Quad Shield, BC

Product Number	Description
Plenum Security	
2037V	Series-59 Security
2054V	Series-59/2x18 Security
2277V	Series-6 Security
PS59BC	Series-59 Security
PS59BCPP	Series-59/2x20 Security
Non-Plenum Security	
5553	Series-59 Security
5554	Series-59/2x18 Security
5700	Series-6 Security
S59BC	Series-59 Security
S59BCPP	Series-59/2x20 Security

Through our industry-defining solutions, we meet and exceed communications expectations for your workplace and your home.

A 20-Year Commitment to Performance

The dedication CommScope has to delivering its offerings with unmatched quality, performance and reliability makes standing behind our products easy. We make sure our customers benefit from that commitment by offering a 20-year warranty that is unique to the industry – no confusion on what is covered, no doubt on who is responsible and no hidden type. Our warranty covers the passive infrastructure elements and the end-to-end channel performance, as well as a wide range of applications today and in the future. If the registered installation does not deliver on this commitment to performance and applications support, we will make sure it is fixed, and we'll do it for 20 years.
