

USD – Universal Service Drop: New Product

North American Communication

CommScope announces a new USD – Universal Service Drop Cable. This fiber drop cable offers the benefits of a single 900µm tight buffer tube fiber for strain-relief on field installed connectors.

This cable replaces the previously offered DF-900 series of flat style drop cables.

- Non-armored, gel-free design
- 900µm tight buffer
- Bend insensitive singlemode fiber G.657.A2/B2 (8G)
- OSP drop cable with UV stabilized jacket
- Toneable design contains a 24 AWG copper conductor
