

Combination hangers for fiber & power cable

Intended for markets that prefer discrete fiber and power cables for FTTH

Global Communication

A new plastic combination hanger is now available for installing FiberFeed Discrete 2-fiber cable and common power cables. Two versions are available to support common installation configurations of one fiber/one power cable to each RRU and two fiber/one power cable to each RRU. Pair these hangers with FiberFeed discrete cables and Commscope hardware kits for a complete cable site solution.

- Designed for 4 to 8mm discrete fiber cables
- Holds common power cables 9-14mm
- Stackable to save tower space
- Compatible with M8, M10 hardware
