

NEX10™ Small Cell RF Cable Assemblies: New Product

Well-positioned for the future demands of the telecom industry, CommScope announces the release of new cable assemblies specially designed for small cell applications to allow more connections in tight spaces: NEX10™ SureFlex® cable assemblies. Even smaller than current industry standard 4.3-10 connectors, NEX10 cable assemblies offer low PIM and low return loss with a compact and robust design ruggedized for outdoor applications. These new connectors are offered on Heliax® ¼” SureFlex cables and are available in CommScope D-Class grade which guarantees PIM performance with 100% dynamic testing.

4.3-10 versus NEX10 Assemblies
