

Category 6A F/FTP cable families 2153290 and 2153428 to be changed to new CS44Z series: Product Change

(EMEA Region)

CommScope announces the new NETCONNECT® CS44Z Category 6A F/FTP series cables to replace the 2153290 and 2153428 cable families. This change will improve our cable offerings and the CS44Z series cables will provide electrical performance on par or above the cables they replace.

The new CS44Z series cables are part of the CommScope NETCONNECT® copper cable portfolio and will serve as direct replacements for legacy AMP NETCONNECT® and CommScope UNIPRISE® Category 6A F/FTP cables.

The CS44Z series cables is available for ordering now. Open and upcoming orders for the 2153290 and 2153428 cable families should be immediately converted to the CS44Z series cables if possible. The 2153290 and 2153428 cable families will not be orderable once existing stock has been depleted. Please contact your CommScope representative for availability.
