

SYSTIMAX® Ultra-low loss (ULL) Singlemode MPO Modules: New Product

CommScope® announces the addition of Ultra-low Loss MPO Singlemode DM modules to its SYSTIMAX family. SYSTIMAX ULL solutions maximize speed and minimize attenuation. MPO-12 supports the legacy system while MPO-8 QSFP provides parallel optic application support. TeraSPEED Singlemode maximize bandwidth and capacity of the fiber cabling system.

Features and benefits

- G2 ULL DM modules have unpinned rear MPO adapters for MPO-8 or MPO-12
- Shutters automatically actuated by connector insertion, allowing for one-handed operation
- Shutters designed to avoid ferrule contact during connector installation
- Shutter door will illuminate when hit with visual fault locator (VFL)
- New latch assist provides easier module removal for faster moves, adds and changes

SYSTIMAX® G2 ULL DM Modules with Internal Shutters

* Note: Internal shutters are not compatible with iPatch. For iPatch compatible modules, see below.

Part number	Product code	Description
760238082	DM08-24LC-SM-ULL	G2 ULL MPO-8 distribution module, 24LC to 3x8f MPOs unpinned, TeraSPEED SM internal shutter
760238083	DM12-24LC-SM-ULL	G2 ULL MPO-12 distribution module, 24LC to 2x12f MPOs unpinned, TeraSPEED SM internal shutter

SYSTIMAX G2 ULL iPatch Ready DM modules

The SYSTIMAX iPatch modules are a component of the imVision® automated infrastructure management (AIM) solution and provide intelligent connectivity.

Part number	Product code	Description
760238084	DM08ip-24LC-SM-ULL	G2 ULL MPO-8 distribution module, 24LC to 3x8f MPOs unpinned, TeraSPEED SM dust caps iPatch ready
760238085	DM12ip-24LC-SM-ULL	G2 ULL MPO-12 distribution module, 24LC to 2x12f MPOs unpinned, TeraSPEED SM dust caps iPatch ready
