

Uniprise® Launch – North America

North America

CommScope is pleased to announce the launch of Uniprise apparatus in North America. As previously announced, Uniprise will contain the core NETCONNECT products sold in North America along with the popular Uniprise offering known today.

This announcement follows the September 2017 NewsFLASH announcing the Uniprise / NETCONNECT cable consolidation in North America, where cabling was combined into the CommScope "CS" family of products.

This document provides Material ID's (MIDs) / part number cross reference for ALL apparatus products that will change as a result of this consolidation.

Key Points:

- The new MIDs will be available February 1, 2018.
- CommScope Category 5e and Uniprise Category 6 jacks now utilize the SL style termination. The MIDs will be changing to reflect the new design.
- NETCONNECT SL jacks are changing MIDs to reflect the new Uniprise name. There are no changes to the functionality of the product.
- NETCONNECT patch panels will no longer be sold as kits containing the jacks. The patch panels will be sold as CommScope patch panels, with the jacks sold separately in bulk packs of 24.
- NETCONNECT patch cords will transition away from the "TCPC" nomenclature to Uniprise "UNC" patch cords..
- Other legacy CommScope, ADC and NETCONNECT patch panels will be superseded by functional equivalents in order to provide a more concise portfolio.
- Effective April 1, 2018, the old MIDs will no longer be available.

Detailed cross reference information begins on page 2.

Additional information, such as comprehensive Uniprise ordering guides and more detailed product information, can be obtained from through your local account manager or at www.commscope.com.
