

Enhanced SYSTIMAX® Shielded S/FTP Patch Cords: New Product

CommScope is proud to announce a new line of SYSTIMAX® Shielded Patch Cords offering the industry a smaller diameter, more flexible patch cord. The new SYSTIMAX cords utilize a 26 AWG stranded S/FTP patch cord cable that is only 5.7mm [0.224in] in diameter for CM cable and 5.9mm [0.232in] for LSZH. The use of 26AWG stranded conductors combined with the small diameter provides for one of the most flexible and smallest shielded patch cords on the market. The S/FTP construction provides for excellent cross-talk performance even at the highest of frequencies.

The patch cord utilizes a slim-line transparent boot that accepts the use of CommScope modular plug color clips (MP-ColorClip) for additional easy circuit/cable identification. Also the new patch cords will support the soon to be released CommScope Pull-Latch for use in high-density applications.

The SYSTIMAX S/FTP patch cords have been tested and provide both patch cord component and channel level performance in compliance with SYSTIMAX GigaSPEED X10D requirements. SYSTIMAX will be consolidating its shielded patch cord portfolio superseding it with this new line of patch cords as indicated below.

- Small diameter cable: 5.7mm [0.224in]
- Highly flexible cable: 26AWG stranded conductors
- Superior Performance: S/FTP Construction
- Supports SYSTIMAX F/UTP cabling systems
- Slim-line, transparent boot supporting both CommScope Color Clips and Pull-Latch
- Available in LSZH and CM rated cables
- Available February 1, 2018

Ordering Information:

Please visit eCatalog at the link provided. <http://www.commscope.com/SiteSearch/?q=CA111>

SYSTIMAX will be superseding its present portfolio of patch cords with this new line of S/FTP patch cords. The last time buy date for the existing line of cords will be May 1, 2018
