

SYSTIMAX® imVision Controller X: New Product

Introducing the new imVision Controller X: With a bigger, brighter capacitive touch screen the newest generation of imVision Controller will provide improved performance with increased power for greater iPatch panel management.

- 5.0" capacitive touch screen
- More power (imVision Controller + imPower)
- Gigabit Ethernet interface
- Patch Data Migration tool allows for hardware upgrade from legacy iPatch managers
- Support for up to three adjacent racks with 10 RU each of intelligence (server rack configuration)
- Requires SYS MGR v8.0 software (available June 2018)

The imVision Controller X is a direct and immediate replacement for the SYSTIMAX 360™ imVision® Controller (360-imV-CNTRLR). For more information regarding compatibility with existing iPatch hardware, please contact CommScope.
