

# Palm Tool Modified to Accept Uniprise and CommScope Outlets: Product Update

*North America Only*

CommScope in support of the recent modifications to the CommScope Cat 5e M-Series Outlets and Uniprise Cat 6 M-Series Outlets to the SL termination block, has modified the existing Palm Tool (569949-1) to accept these new outlets. While CommScope highly recommends that the CommScope SL Tool (1725150-1) be used with these outlets because of simplification and consistency of terminations, we recognize that some installers prefer the use of the 110-Tool.

The CommScope Palm Tool (569949-1) has three compartments to hold various forms of jacks/outlets in place while using the 110-Tool.

- SL Compartment: For use with the SL and KJ (Keystone) interface jacks
- M-Series Compartment: For use with the M-Series Outlet with SL termination block
- ACO Compartment: For use with the ACO Edge Connector

Note: The Palm Tool does not accommodate the Systemax Outlets or the Uniprise Cat 6A USL10G Outlet. Users are to continue to use the CommScope MGS Handheld Termination Tool (760034215).

## Ordering Information:

Please visit eCatalog at the link provided.
