

# FIST Splice/Patch Sub-Assembly Kit: New Product

Introducing the FIST Splice/patch sub-assembly kit with 2 trays and 1 groove plate, each for holding up to 2 fiber adapters (2SC simplex or 2 LC duplex) and 8 splice protectors.

The splice patch tray fits all FIST MK2 organizers and provides a unique solution when a small number of patch/test or demarcation points are required at any possible location in the network.

The splice patch tray can be called: "all in one" as this solution provides the patch, splice and fiber storage in one 3UMS tray and is compatible with all FIST MK2 trays.

Another great feature is it's compactness. Current MDU patch panels used in closures are rather space consuming and bulky. The FIST kit can be built and expanded as needed.

## Features and Benefits

- Proven FIST fiber management system
- Compatible with all FIST MK2 trays and groove plates
- Can be mixed with all FIST MK2 trays
- Compact: 3 UMS positions per tray
- Splicing capacity: 8 x smouv 45 mm
- 2SC Simplex or 2 LC Duplex adapters (flangeless)

## Ordering Information:

Part Number	Description
FIST-SOSA2-2SP-2	Kit contains: 1 groove plate, 2 trays and installation instruction
