

RealFlex® 4 Fiber Hardened Breakout Drop: New Product

CommScope is pleased to announce the new 4 Fiber Hardened Breakout Drop, now available globally.

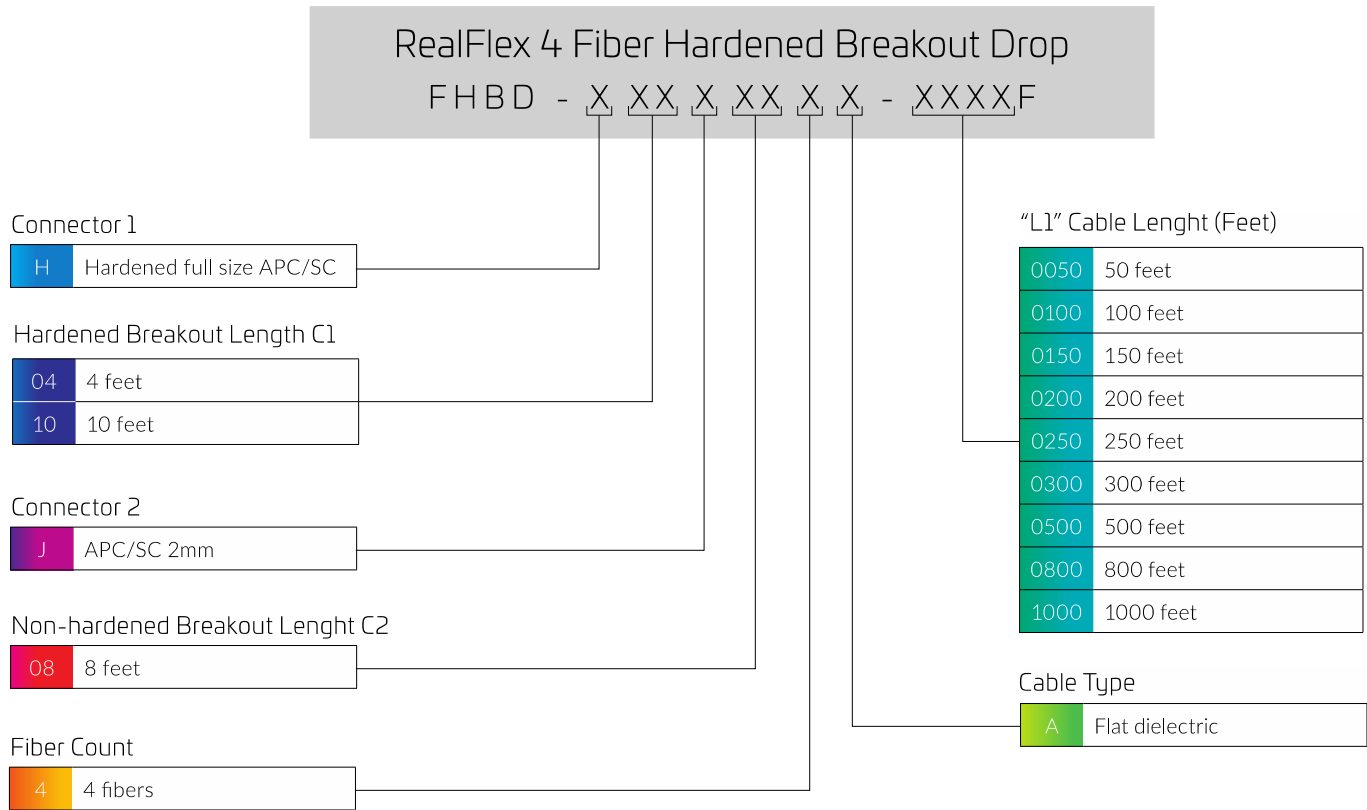

The 4 fiber hardened breakout drop will be factory terminated with 4 Hardened SC/APC connectors on one side of the assembly and 4 SC/APC connectors on the other end. It will be available with standard dielectric flat drop cable, breaking out to a 2mm cable.

Features and Benefits

- Plug-and-play solution for durable and reliable service connections
- Technician friendly – Minimizing splicing
- Cost-effective solution that contributes to lower labor costs by maximizing line crew resources for high density FTTH installations
- Available in dielectric flat drop cable

Ordering Tree

*Cable length is overall length from connector to connector.
