

4-foot Multiband Antenna for 600 MHz applications: New Product

CommScope has expanded its family of 600 MHz band antennas with the introduction of model FFHH-65A-R3. This 8-port antenna is well suited for applications in the 600, 700, 1900 and 2300 MHz bands.

- Provides **4X MIMO** capability for multiple frequency bands.
- Features **independent tilt** for the AWS, PCS and WCS bands for use in LTE applications.
- Shorter length provides for **ease of installation and zoning**.
- Features three internal RETs controlled by a **single AISG input** for ease of implementation.
