

FD Fiber Patch Panel, MPO-8 Breakout Panel: New Product

CommScope announces the release of the new FD fiber patch panel which interfaces with singlemode MPO-8 ports including QSFP to easily break them out into LC connections. The FD panel will breakout up to 20 MPO-8 ports into 80 duplex shuttered LC ports. The MPO and LC ports are both front facing and bundled for easy mapping and patching.

- Front facing for easy patching
- Removable cable managers
- Available in 1U and 2U
