COMMSCOPE®

Our inspiration

Communication is essential.
It inspires and motivates us.

We exist to enable and improve
the way we learn, work and live.

We are excited about the possibilities
and wonders of technology.

Our ambition

The number of connected devices and data use are expected to grow exponentially. To anticipate increasing communication demands, we're constantly challenging what's available now and thinking beyond to meet the needs of what's next.

Our impact

We create connections between people, devices and networks by offering end-to-end solutions that are designed and built with superior materials, systems and application expertise to shape the networks of the future. CommScope exists to grow and optimize bandwidth and connect more people to information and one another.

Building better connections

Shaping networks of the future

Growing and optimizing bandwidth

Building better connections

In the ground, in buildings or through the air, CommScope understands that your network must be robust and reliable. Our solutions are built with products and systems that are modular, cost-effective and easy to install and maintain. We believe the smallest details can give you an edge in performance and a better experience. Whether it's by improving capacity, finding ways to decrease latency and boost performance or creating connectivity solutions that are easier to use, CommScope can help you discover more intelligent solutions for success.

Shaping the networks
of the future

A stylized cityscape composed of white, rectangular blocks of varying heights and widths, representing buildings. A large, green, semi-transparent triangular shape is overlaid on the left side of the image, pointing towards the right. The background is white. The text is positioned on a solid green rectangular area on the right side of the image.

For more than 40 years, we've been leaders in innovating the network infrastructure of the future. Developments such as the Internet of Things, seamless connectivity and 5G introduce new requirements and demand creative thinking. With our unmatched expertise in copper, fiber and wireless infrastructure, rely on us to enhance and migrate your network to outperform today and be ready for the needs of tomorrow.

Growing and optimizing bandwidth

As the number of connected devices and the amount of data they use increase at exponential rates, we understand your need for continuous improvements. From material and product design and patented components to applications and architecture, we aim to deliver solutions that enhance the speed, efficiency and performance of your network.

Pushing what's possible

As companies grow and globalize, CommScope is prepared to serve our customers in more markets around the world. Our talented people, global manufacturing and distribution network give us the freedom and flexibility to deliver a consistent level of quality for tomorrow's dynamic marketplace.

20,000

global employees focused on creating the best solutions and delivering the best customer experience

10,000

global patents and patent applications

100

nations served by 500+ distributors
and 30+ CommScope manufacturing
and distribution centers

1st

in guiding the creation of wireless
networks, intelligent buildings and
data centers

6,000+

installation partners and
hundreds of CommScope field
application engineers

Passion for progress

An aerial, top-down view of a diverse group of people walking on a wide, teal-colored path that runs diagonally across the frame. The path is set against a plain white background. The people are seen from above, showing various clothing styles, colors, and ethnicities. Some are walking alone, while others are in small groups. The overall scene conveys a sense of movement and diversity.

At CommScope, integrity drives everything we do. Our ethical and fair business practices are a key reason why customers continue to work with us, demonstrating our commitment to investing in our future. Integrity pushes our employees to outperform and consistently deliver above our high standards of excellence.

The future
is always on.
So is CommScope.
