COMMSCOPE®

SaskTel Selects ARRIS HomeAssure™ Solution – comprising Gateways, Extenders and Eco Cloud Device Management – to Deliver Premium Wi-Fi® Service throughout Saskatchewan

Release Date: June 20, 2019

Terms: Wireless

Dateline City: HICKORY, NC

ARRIS (now part of CommScope) today announced that SaskTel has selected the ARRIS HomeAssure™ solution to bring new high-performance Wi-Fi services to subscribers across Saskatchewan, Canada.

The HomeAssure solution is designed to ensure a high-quality Wi-Fi experience. It improves Wi-Fi coverage and performance, automatically optimizing the home network; and it facilitates set-up and management for the growing number of Wi-Fi devices and applications in the home.

CLICK TO TWEET: SaskTel will bring high-performance Wi-Fi services to subscribers across Saskatchewan, Canada using the ARRIS HomeAssure solution.

The ARRIS HomeAssure Self-Service app will allow SaskTel subscribers to see which devices are on their home Wi-Fi network, and identify weak Wi-Fi signal locations. It also allows users to improve signal quality through optimal network extender placement, as well as set internet access rules for authorized devices on the network. Together with ARRIS's leading broadband gateways and extenders, the ARRIS HomeAssure solution works to cover homes in fast, reliable Wi-Fi, while creating operational and support efficiencies for SaskTel.

"We're excited to work with ARRIS to bring our customers a top-tier Wi-Fi experience that allows them to make the most of their internet connection, everywhere in their home," said Doug Burnett, SaskTel president and CEO. "This new technology solution also has the added benefit of creating new efficiencies for SaskTel that will help us to manage our operating and support costs for internet service going forward."

SaskTel will use the HomeAssure solution in concert with the following ARRIS offerings to maximize Wi-Fi performance and coverage: ARRIS® NVG448BQ residential gateways, VAP4641 wireless extenders, GPE2001 G.hn extenders, and the ECO Self-Service cloud-based Wi-Fi management and mobile app. The ARRIS broadband gateways and extenders will dynamically optimize Wi-Fi performance throughout the home based on coverage, usage and mobility. The ARRIS VAP4641 wireless extender was the first Wi-Fi CERTIFIED EasyMesh™ solution on the market, allowing it to work seamlessly in a unified Wi-Fi network.

"What makes a great Wi-Fi experience is having the right combination of technology inside and outside of the broadband gateway," said Larry Robinson, senior vice president and segment leader, Customer Premises Equipment at CommScope. "With the ARRIS HomeAssure solution, subscribers don't need to wait for a technical service visit in the event of an issue. They can resolve the issue themselves, instantly. Our work with SaskTel goes beyond fast and reliable Wi-Fi, by taking a modern and holistic approach to providing the best Wi-Fi experience to broadband subscribers."

About SaskTel:

SaskTel is the leading Information and Communications Technology (ICT) provider in Saskatchewan, with over $1.2 billion in annual revenue and approximately 1.35 million customer connections including 610,000 wireless accesses, 333,000 wireline network accesses, 283,000 Internet accesses and 113,000 maxTV subscribers. SaskTel and its wholly-owned subsidiaries offer a wide range of ICT products and services including competitive voice, data and Internet services, wireless data services, maxTV services, data centre services, cloud-based services, security monitoring services, advertising services, and international software and consulting services. SaskTel and its wholly-owned subsidiaries have a workforce of approximately 3,900 full-time equivalent employees (FTEs). Visit SaskTel at www.sasktel.com.
