3.0m | 10ft Sentinel® Ultra High Performance, Super High XPD Antenna, dual-polarized, 3.600 – 4.200 GHz, grey, CPR229G flange

## Product Classification

### Product Type

Microwave antenna

## General Specifications

### Antenna Type

USX - Sentinel® Ultra High Performance, Super High XPD Antenna, dual-polarized

### Polarization

Dual

### Antenna Input

CPR229G

### Antenna Color

Gray

### Reflector Construction

Two-piece reflector

### Radome Color

Gray

### Radome Material

Fabric

### Flash Included

Yes

### Side Struts, Included

2

### Side Struts, Optional

3

## Dimensions

### Diameter, nominal

3.0 m | 10 ft

## Electrical Specifications

### Operating Frequency Band

3.600 – 4.200 GHz

### Gain, Low Band

38.3 dBi

### Gain, Mid Band

38.9 dBi

### Gain, Top Band

39.5 dBi

### Boresite Cross Polarization Discrimination (XPD)

40 dB

### Front-to-Back Ratio

69 dB

### Beamwidth, Horizontal

1.9 °

### Beamwidth, Vertical

1.9 °

## \* Footnotes

### Operating Frequency Band

Bands correspond with CCIR recommendations or common allocations used throughout the world. Other ranges can be accommodated on special order.

### Gain, Mid Band

For a given frequency band, gain is primarily a function of antenna size. The gain of Andrew antennas is determined by either gain by comparison or by computer integration of the measured antenna patterns.

### Boresite Cross Polarization Discrimination (XPD)

The difference between the peak of the co-polarized main beam and the maximum cross-polarized signal over an angle twice the 3 dB beamwidth of the co-polarized main beam.

### Front-to-Back Ratio

Denotes highest radiation relative to the main beam, at  $180^\circ \pm 40^\circ$ , across the band. Production antennas do not exceed rated values by more than 2 dB unless stated otherwise.

### Return Loss

The figure that indicates the proportion of radio waves incident upon the antenna that are rejected as a ratio of those that are accepted.

### VSWR

Maximum; is the guaranteed Peak Voltage-Standing-Wave-Ratio within the operating band.

### Radiation Pattern Envelope Reference (RPE)

Radiation patterns define an antenna's ability to discriminate against unwanted signals. Under still dry conditions, production antennas will not have any peak exceeding the current RPE by more than 3dB, maintaining an angular accuracy of  $\pm 1^\circ$  throughout

### Cross Polarization Discrimination (XPD) Electrical Compliance

The difference between the peak of the co-polarized main beam and the maximum cross-polarized signal over an angle twice the 3 dB beamwidth of the co-polarized main beam.

### Wind Speed, operational

For VHLP(X), SHP(X), HX and USX antennas, the wind speed where the maximum antenna deflection is 0.3 x the 3 dB beam width of the antenna. For other antennas, it is defined

# USX10-3-6GF

---

as a deflection is equal to or less than 0.1 degrees.

## **Wind Speed, survival**

The maximum wind speed the antenna, including mounts and radomes, where applicable, will withstand without permanent deformation. Realignment may be required. This wind speed is applicable to antenna with the specified amount of radial ice.

## **Axial Force (FA)**

Maximum forces exerted on a supporting structure as a result of wind from the most critical direction for this parameter. The individual maximums specified may not occur simultaneously. All forces are referenced to the mounting pipe.

## **Side Force (FS)**

Maximum side force exerted on the mounting pipe as a result of wind from the most critical direction for this parameter. The individual maximums specified may not occur simultaneously. All forces are referenced to the mounting pipe.

## **Twisting Moment (MT)**

Maximum forces exerted on a supporting structure as a result of wind from the most critical direction for this parameter. The individual maximums specified may not occur simultaneously. All forces are referenced to the mounting pipe.

## **Packaging Type**

Andrew standard packing is suitable for export. Antennas are shipped as standard in totally recyclable cardboard or wire-bound crates (dependent on product). For your convenience, Andrew offers heavy duty export packing options.
