

COMMSCOPE®

Comsearch® Spectrum AtlasSM

The interactive guide to spectrum use,
market by market, coast to coast

We created Spectrum AtlasSM to help you map out your strategy with confidence

The map is growing more complex

With every spectrum auction, thousands of new licenses are issued in markets across the United States, and frequency use is constantly changing even between auctions. As the map of spectrum licensing changes and grows more complex, you need a smart, up-to-date guide to help you plan your spectrum purchases or product development, avoid problems and maximize ROI.

Spectrum Atlas from Comsearch[®] is your guide

Spectrum AtlasSM can show you the big picture or drill down to the most granular details, by county or by market, so you always know the spectrum landscape before you make a single move, anywhere in the United States.

Interactive, up-to-date analytics and intelligence

Spectrum Atlas is aptly named because it presents the most current available information, just the way you need it. Updated quarterly to include all the latest FCC data, Spectrum Atlas reveals competitive challenges and partnership opportunities on as large—or small—a scale as you require. The alternative is to spend valuable resources poring through complicated raw data from the FCC, with the task of interpretation falling to the end user—a costly burden.

Get current data, wherever you are

Because Spectrum Atlas is available as a downloadable interactive spreadsheet and as an online subscription, you will always have the latest analytics at hand—even when you're away from the office.

How complex can the spectrum map really get?

Pretty complex.

Consider Jefferson County in New York State, where there are **eight** different licensees, each using parts of **thirteen** different bands. They range from national wireless operators to satellite TV providers.

We're committed to your network strategy

See the markets...

Intuitive, interactive maps and charts provide customized views and analysis based on the criteria you supply. See a market, county, state or the entire nation at once and instantly understand:

- Spectrum depth weighted by population
- Urban, suburban and rural spectrum distribution
- Carrier names and what blocks they own
- Leases and future spectrum acquisitions
- Monetary value of spectrum per market

...and see the spectrum

Spectrum Atlas covers all widely-used bands, including:

- AWS-1, AWS-3, AWS-4
- PCS (1.9 GHz)
- 600 MHz
- WCS (2.3 GHz)
- 700 MHz
- BRS and EBS (2.5 GHz)
- 800 MHz
- mmWave bands (24, 28, 39 GHz)
- Cellular

Who needs Spectrum Atlas?

The information Spectrum Atlas can provide is useful to many industries and interests, including:

- Strategy and business development
- Product development
- Regulatory managers
- Financial analysts
- RF managers
- Attorneys
- OEMs
- And more

Insights you can build on...

Spectrum Atlas puts the full map of national spectrum holdings right at your fingertips, telling you everything you need to know in order to advance your business-critical spectrum acquisition initiatives or product development.

...with expertise you can count on

We created Spectrum Atlas to help inform your long-term network strategy. Like all our solutions, we put deep expertise to work in order to provide as future-proof an experience as possible. Contact your Comsearch® representative today to learn how Spectrum Atlas can help you map your business strategy.
