

Color Code Labels for FACT

For optimal jumper management and ease of installation, these color code labels can be placed on the side of the FACT-elements. The color coding will work in combination with the FIST-GR3 color labels on the frame back plate and frame spools.

- **1.** Select the color code based on the color selection table. Color selection is defined by the mounting position in the frame.
- 2. Place the color code label on the side of the jumper entry in the FACT- element. Choose the jumper entry located at the spool side (left/right).
- **3.** Check correct label placement: colors on FACT should match the color coding on the frame back plate.
