PIM-Guard™ SnapTak™ Gen 2 adjustable cable hangers

COMMSCOPE®

SnapTak Gen 2 is the second generation of PIM-Guard adjustable composite hangers. They support fiber, power, hybrid, coaxial and data cables. The small, form factor hangers are stackable up to three deep to maximize tower utilization. Utilizing just two hangers, the flex tabs adjust to the exact cable diameter from 4 millimeters to 17 millimeters.

PRODUCT IMPROVEMENTS:

- Enhanced design for easier installation and removal
- 2 hangers vs 4 Gen 1 hangers
- Can rotate 360 degrees

Check out the entire family of CommScope PIM-Guard products, including brackets for antenna and radio cable support and management, at www.commscope.com/solutions/pim-mitigation-solutions.

CommScope designs and builds the connectivity for the world's most advanced communications networks.

SIMPLE	FAST	ECONOMICAL

	Hanger	Cable range, min to max, mm
	SSH-411	4.0 to 11.0
	SSH-1117	11.0 to 17.0

RELIABILITY IN A SNAP

SnapTak PIM-Guard adjustable hangers are tested rigorously to ensure exceptional reliability and durability:

- Tested to IEC standards
- Exceptional reliability in extreme weather conditions
- Backed by CommScope's 10-year warranty
- Stackable hanger
- Manages multiple cables, multiple sizes, multiple types
- Provides simplified BOMs and inventory management
- Enable high-density cable management
- Accommodate any tower or mounting structure with 3/4" holes and/or adapters
