

CommScope at a glance

We shape the networks of the future. Our unmatched expertise in copper, fiber, wired and wireless infrastructure underpins today's networks and ensures you're ready for tomorrow. From material design to solving the most complex architecture and bandwidth challenges, we enable 5G, private networks and gigabit speeds everywhere. For over 40 years, our global team—consisting of more than 30,000 employees, innovators and technologists, has empowered customers worldwide to anticipate what's next and push the boundaries of what's possible.

- Our network solutions offering**
- VENUE & CAMPUS**
- Cables and management
 - Network management
 - Racks and components
 - Structural support tools
 - Accessories
 - RUCKUS® access points, switches, analytics and assurance, IoT networking
- BROADBAND**
- Access Network Cabling (Copper, FTTH, HFC and headend, and CO)
 - PON and DOCSIS deployment solutions
 - Professional services
- OUTDOOR WIRELESS**
- Base station antennas
 - Microwave antennas
 - Combining and filter systems
 - FTTA cabling solutions
- HOME**
- Gateways, modems, home networking
 - Set-tops, streamers
 - Smart media devices

CommScope fast facts

GLOBAL LEADER
in infrastructure solutions for communications networks

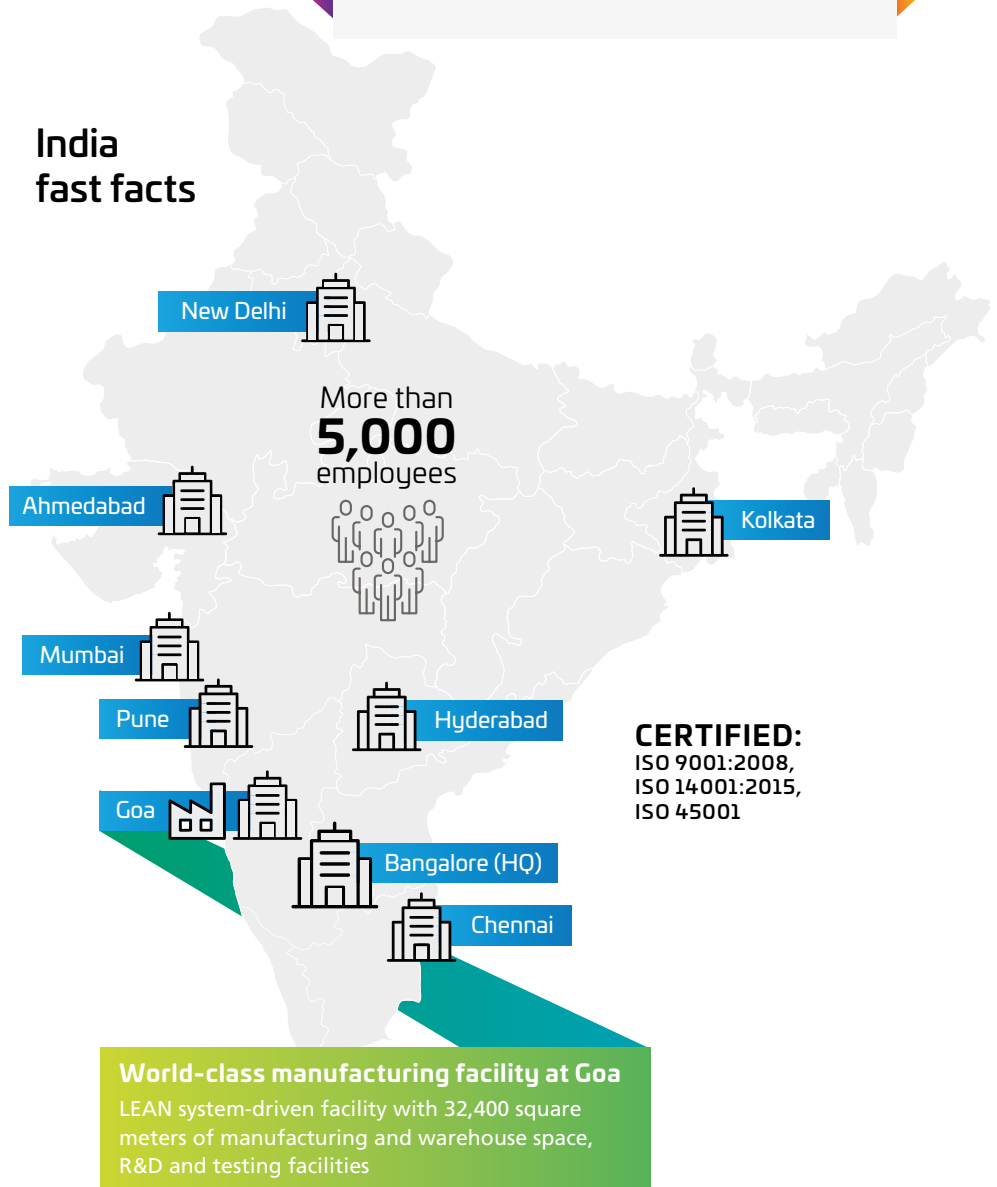

25,000 employees/innovators

55 supply chain locations

15,000 patents

\$8.44B 2020 sales

India fast facts

Creating lasting connections

PRODUCTS MANUFACTURED

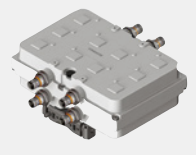

Base station antennas

ValuLine® terrestrial microwave antennas

Filters

Inside plant copper

Inside plant fiber

Access network cabling and connectivity

THE COMMSCOPE ADVANTAGE

Market-leading brand

- Voted No. 1 connectivity brand by various media houses

Training and expertise

- RCDD and DCDC certified experts
- Design, technology and training support
- Globally accredited online and classroom training
- Unique Global Product Warranty and Application Assurance Program

360° product range

- End-to-end solutions for today's and tomorrow's connectivity requirements

Support

- Order management team in Gurgaon, Mumbai and Bangalore works for different BUs and provides local customer outreach

COMMSCOPE INNOVATION CENTER (CIC) BANGALORE

The CIC is a state-of-the-art innovation center showcasing our solutions ranging from Enterprise Connectivity solutions to the Outdoor Microwave Antenna solutions.

The CIC has three interconnected product zones—enterprise, telecom/FTTH and data centers.

Live demonstrations of all products provide our customers with a greater opportunity to see and learn about the latest technologies underpinning the most advanced networks in the world.

CommScope offers solutions, resources, expertise and support to help you make smart decisions and build a future-ready network—fast—while managing costs and resources. Find out more—get in touch today!
